

NEW FOR 2017

PRO-917

DLP® Laser-Phosphor Illumination System, 6000 ANSI, 5 lens options

Wolf Cinema's favorite new laser/phosphor projector – the PRO-917 boasts 6000 ANSI peak white performance, excellent color imaging, WUXGA resolution (1920 x 1200, with full HD compatibility) and much more to accommodate screens up to 16' [~4.8m] wide. Improved color wheel phosphor coatings enables a wider, more accurate color gamut – resulting in bright, punchy colors and imaging performance often lacking in early generation laser/phosphor projectors. Five extended throw lens choices are available to satisfy some of the most demanding installation requirements. IR, RS-232 and LAN control provide advanced integration capabilities with today's leading automation systems.
